EDUCATION

Bachelors of Engineering (Computer Engineering)

2021 – 2025

Government Engineering College Modasa (GTU)

CPI: 7.99 | CGPA: 7.82

Higher Secondary Education (XII Science – PCM)

2020 – 2021

Rumi English High School

Percentage: 79.07%

SKILLS

Technical Skills

- **Programming:** Python (NumPy, Pandas, Matplotlib)
- **Data Science & ML:** Scikit-Learn, PyTorch, Machine Learning, Data Analysis, Agentic AI, RAG
- **Tools:** Streamlit, Jupyter Notebook, Git

Intrapersonal Skills

- **Strengths:** Analytical Thinking, Adaptability, Leadership, Teamwork

EXPERIENCE

Freelance AI Engineer

May 2026 – Jun 2026

Key Skills: Python, LangGraph, Streamlit, MongoDB Atlas, OpenRouter

- Developed an AI-powered web application to manage reinforcement formula and custom shape requests for construction estimation.
- Built a LangGraph-based conversational assistant for structured request collection, validation, and approval workflows.
- Developed project-specific formula override functionality, secure role-based authentication, and MongoDB Atlas integration.
- Deployed the application on Streamlit Community Cloud using a modular service-oriented architecture.

Infolabz IT Services PVT. LTD., Ahmedabad

Jan 2025 – Apr 2025

AI/ML Intern

Key Skills: Python, Scikit-Learn, Streamlit

- Designed and deployed RevCast AI, a revenue forecasting app using Random Forest Regressor on historical sales data.
- Applied data preprocessing to uncover seasonal patterns and market trends.
- Built interactive Streamlit visualizations for business stakeholders to interpret forecast results.

IBM (CSRBOX)

Jun 2024 – Jul 2024

Data Analytics Intern (Remote)

Key Skills: Data Analysis, Pandas, Statistical Techniques

- Analysed large datasets to identify trends and develop meaningful insights, improving data accuracy by 15%.
- Provided data-driven solutions using mathematical and statistical techniques.
- Analysed data for a water potability project (HydroSense), contributing to public health insights.

PROJECTS

JuriGPT – AI Legal Assistant for Indian Law

Live: <https://jurigpt.vercel.app>

Tech Stack: Python, FastAPI, React, TypeScript, LangChain, Google Gemini, ChromaDB, MongoDB Atlas, Docker

- Engineered a Retrieval-Augmented Generation (RAG) pipeline that processed PDF, Markdown, and text legal documents using recursive chunking, E5 embeddings, metadata preservation, and semantic retrieval with ChromaDB.
- Implemented grounded Gemini response generation with context deduplication, source attribution, multilingual (11-language) streaming, JWT authentication, Argon2 password hashing, and MongoDB-backed conversation management.
- Developed an intent-driven legal document generation workflow with mandatory follow-up validation, professional PDF drafting, and a responsive React frontend with Tailwind CSS, Framer Motion, and comprehensive RAG pipeline testing.

CaptionCaptain – Multimodal AI Video Captioning System

Live: captioncaptain.streamlit.app

Tech Stack: Python, OpenCV, Fireworks AI API, Streamlit, Docker, Pydantic

- Developed a Dockerized multimodal AI pipeline that extracts video keyframes and generates context-aware captions in multiple writing styles using Vision-Language Models.
- Built an automated inference workflow with frame preprocessing, prompt engineering, structured JSON generation, and robust response validation for reliable outputs.
- Implemented image preprocessing and containerized the application for reproducible deployment, supporting both automated evaluation and an interactive Streamlit interface.

RevCast – ML Based Revenue Forecasting App

Live: <https://revcast.streamlit.app>

Tech Stack: Python, Streamlit, Pandas, NumPy, Scikit-learn, Plotly, Matplotlib, Seaborn, Joblib

- Developed an AI-powered revenue forecasting application using Random Forest regression models to generate monthly, quarterly, and yearly revenue predictions.
- Engineered transaction data into time-based and business features, including revenue, seasonality, weekends, hours, and quarters; evaluated forecasting performance using Mean Absolute Error (MAE).
- Built an interactive Streamlit dashboard with authentication, trend analysis, branch/category performance, customer behaviour insights, and dynamic Plotly visualizations.

HydroSense – Water Quality Predictor

Live: <https://hydrosense.streamlit.app>

Tech Stack: Python, Streamlit, RandomForestClassifier

- Developed a web app to predict water potability using ML algorithms; achieved 67% prediction accuracy.
